Node.js API

Deployment

AWS, Docker for containerization

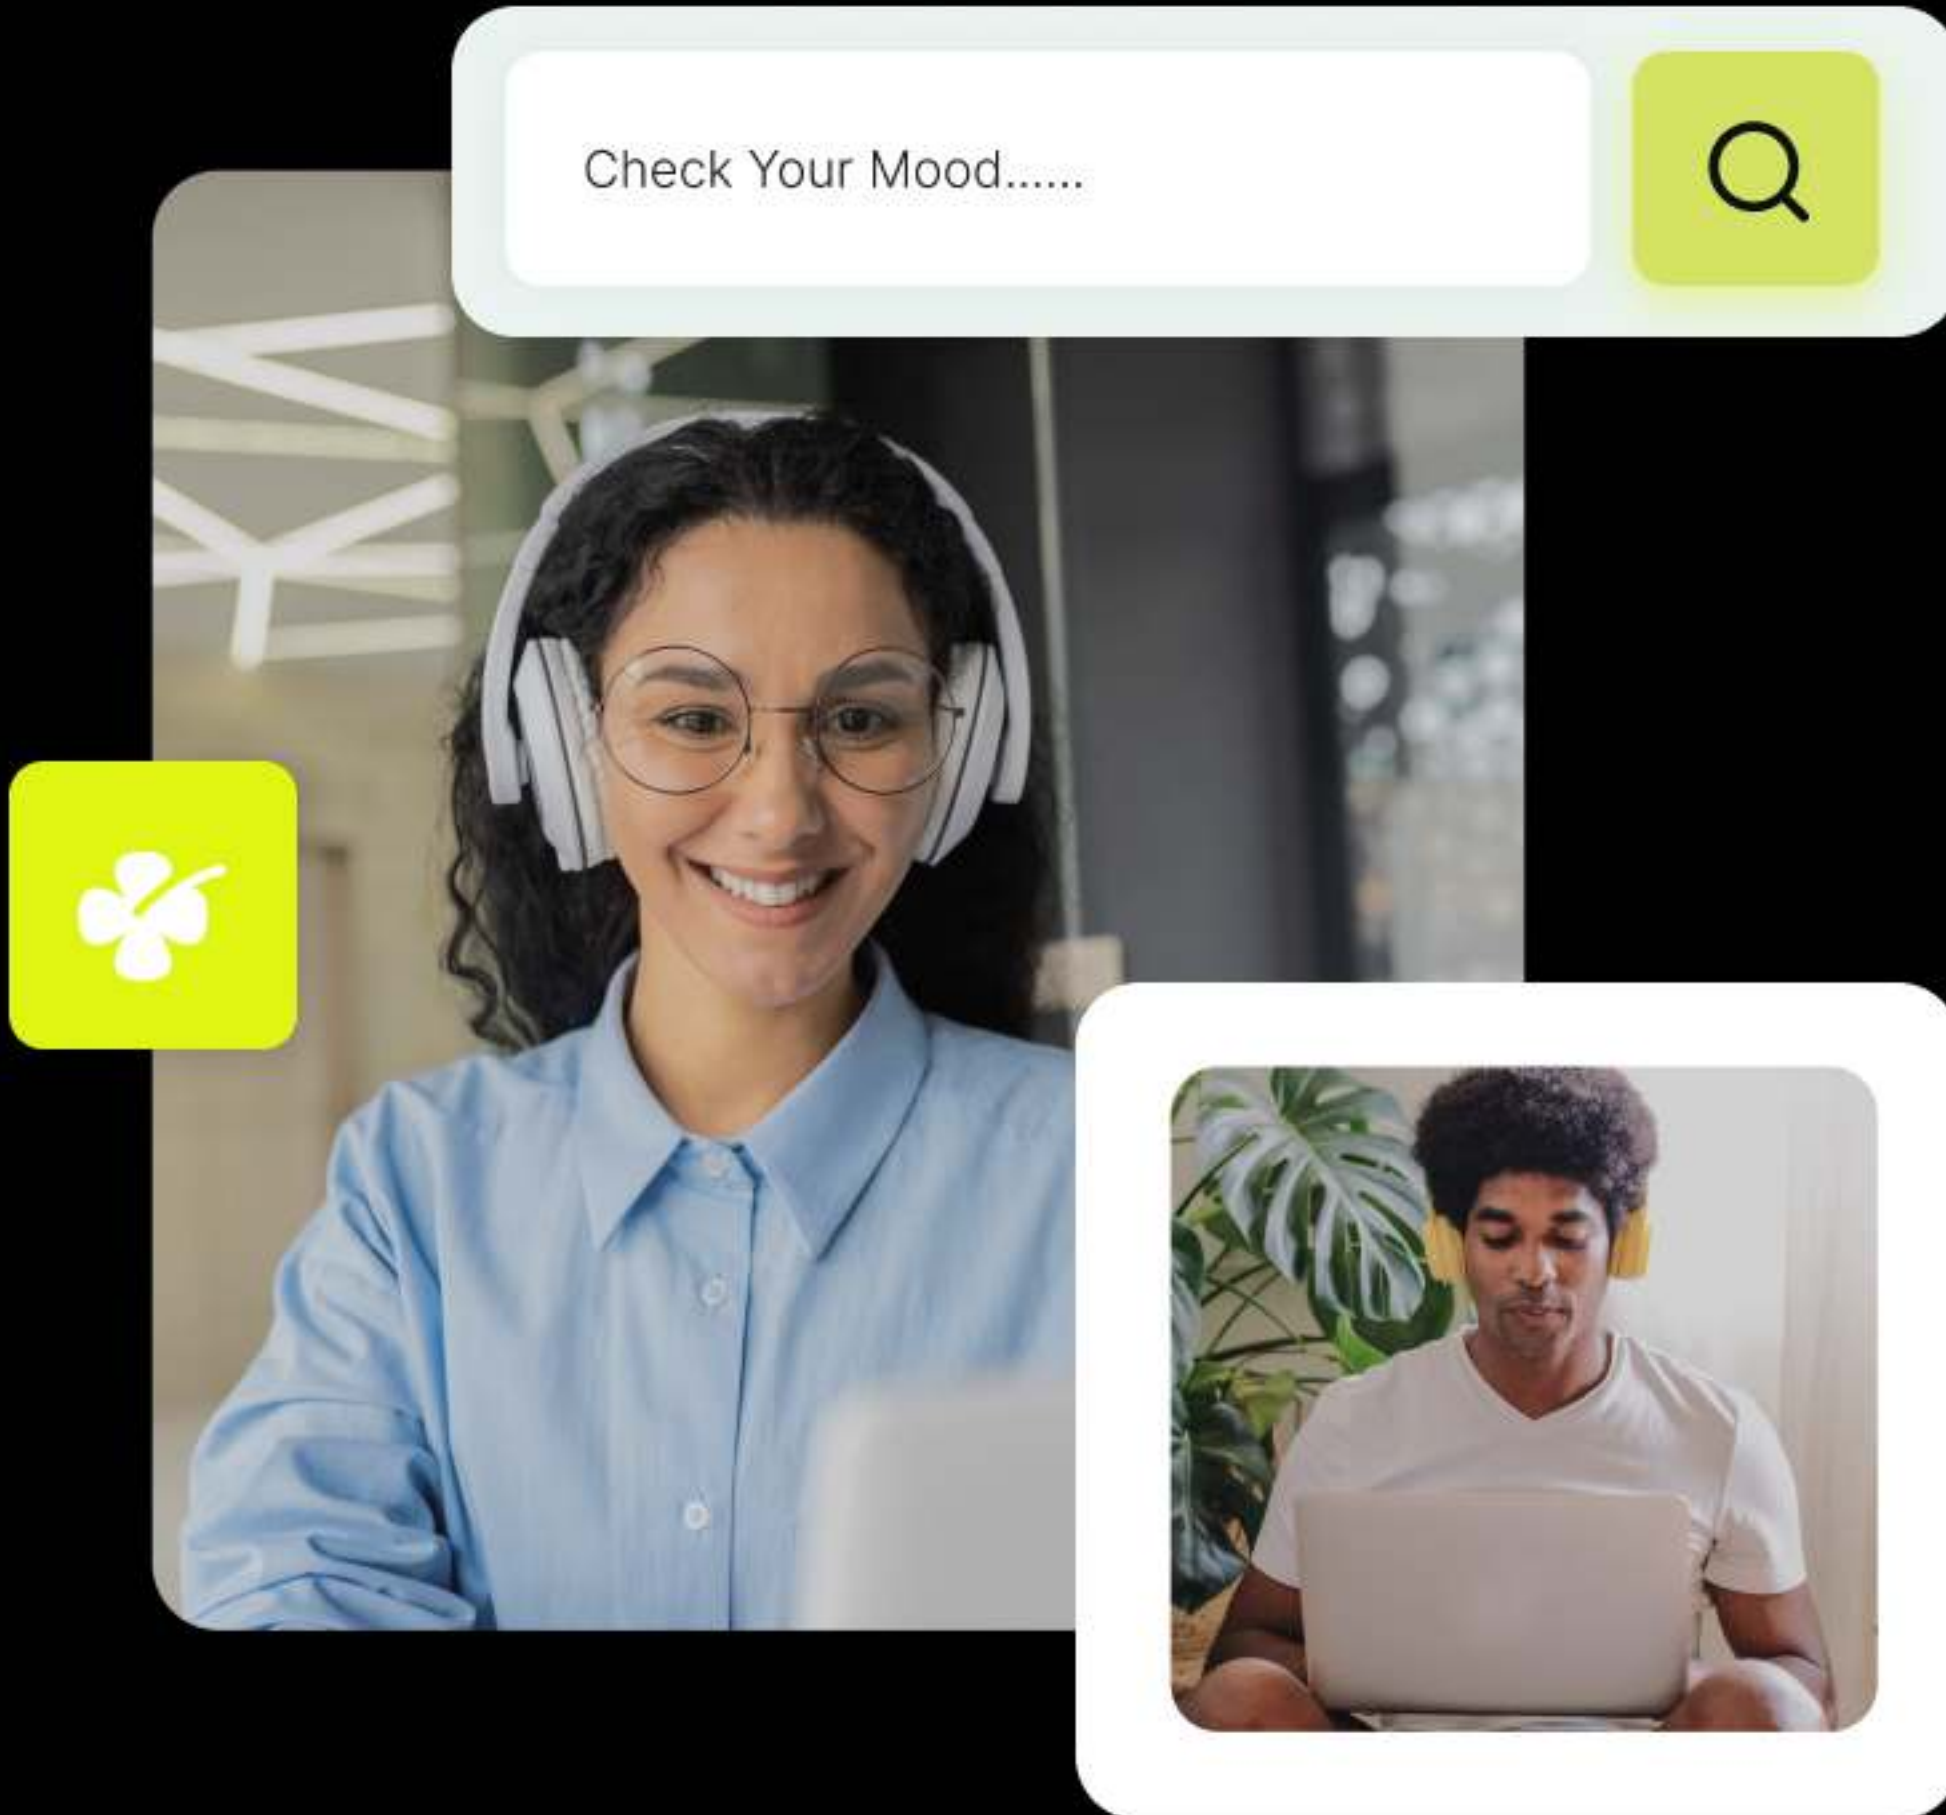

Get Your Conversational Chatbot

The AI-powered chatbot offers conversation prompts based on user inputs, providing a natural, empathetic dialogue. NLP models are fine-tuned for sentiment analysis, adjusting responses to reflect empathy and encouragement.

Check Health 

Results That Reflect Real-Life Success

The app had to simulate empathetic and meaningful conversations, tracking user mood, offering coping strategies, and providing a virtual companion to those seeking help with anxiety, stress, or simply needing someone to talk to. Additionally, users should be able to set mental wellness goals and visualize their progress.

- ✔ Interactive Exercises
- ✔ Dynamic Content Management
- ✔ Personalized Notifications
